INDIVIDUAL / START POWER FEED FIXTURE INSTALL

1) **LAYOUT WMC CHANNEL**

Measuring from the start of the WMC Channel:

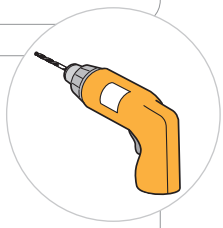

— Identify the structure mount points (M1, M2).

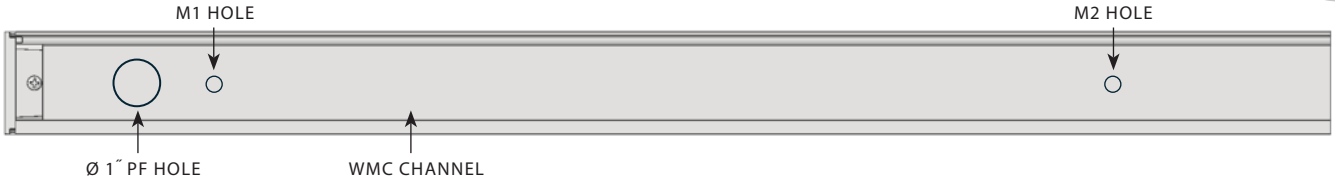

— Identify the location for the power feed from wet-location outlet box (PF).

2) — Drill the M1/M2 holes at the identified locations from step #1.
The hole size is dependent on the mounting hardware (by others).

— Drill a Ø 1˝ PF hole in the WMC channel at the identified location from Step #1.

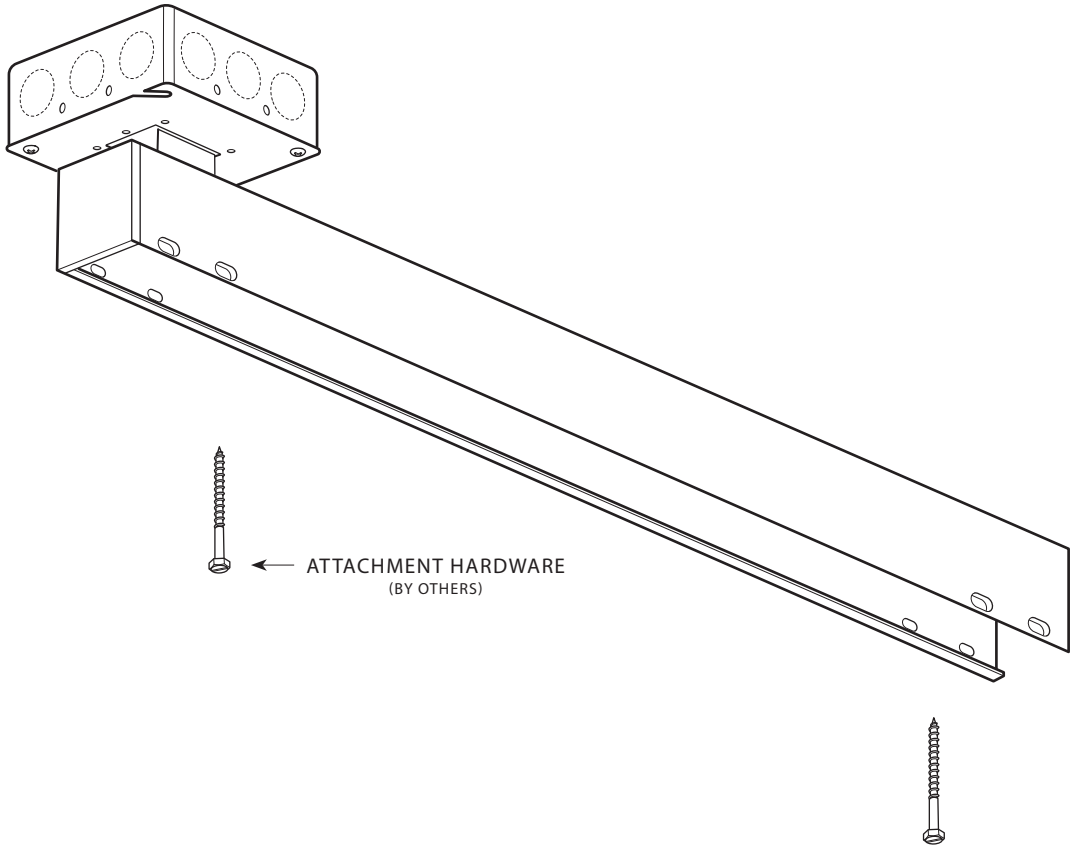

WARNING: Ground fixture in accordance with local and national electrical codes. Failure to do so may result in serious personal injury
Fixture Installations should ONLY be done by a qualified licensed electrical professional.

BionicPro & BionicPro2 Mini | Linear

Surface/Wall WMC .75˝+2˝ Continuous Channels

INSTALLATION INSTRUCTIONS

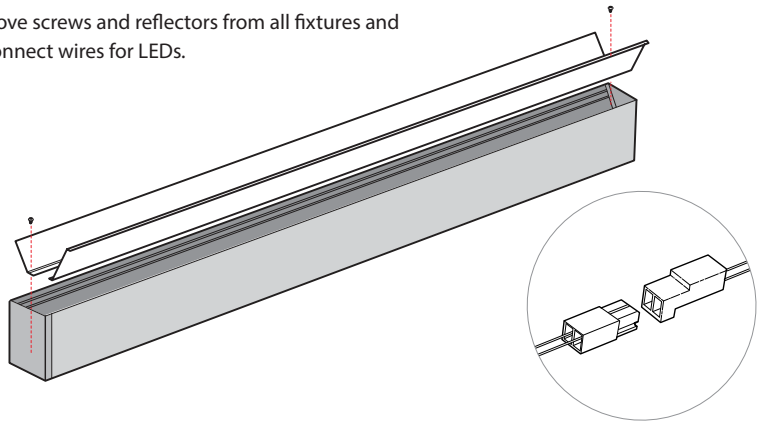

PRUDENTIAL LTG.

PRULITE.COM 213.746.0360

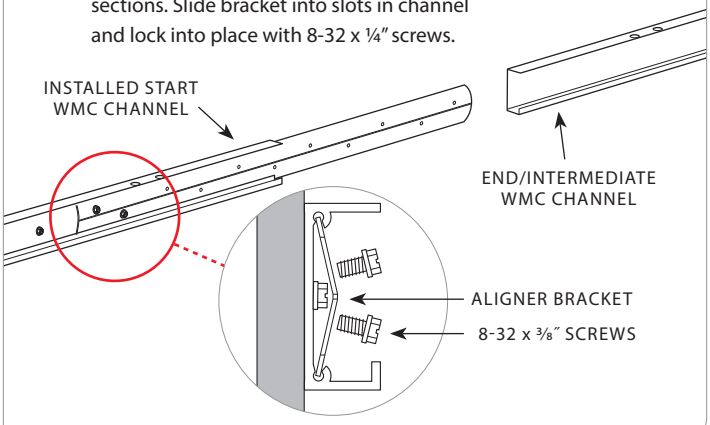

WMC WALL ROW FIXTURE INSTALL

DO NOT BUILD ROWS ON FLOOR TO HOIST **REQUIRES TWO PEOPLE TO INSTALL** **POWER CORD SHIPPED ATTACHED**

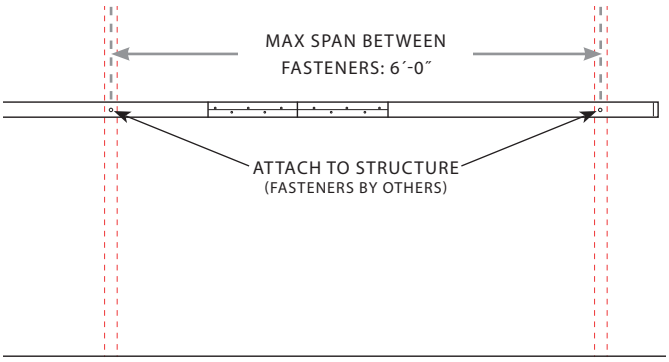

1) Remove screws and reflectors from all fixtures and disconnect wires for LEDs.

2) Continue to layout the next Intermediate or End WMC Channel section, using the channel aligner bracket to align channel sections. Slide bracket into slots in channel and lock into place with 8-32 x ¼" screws.

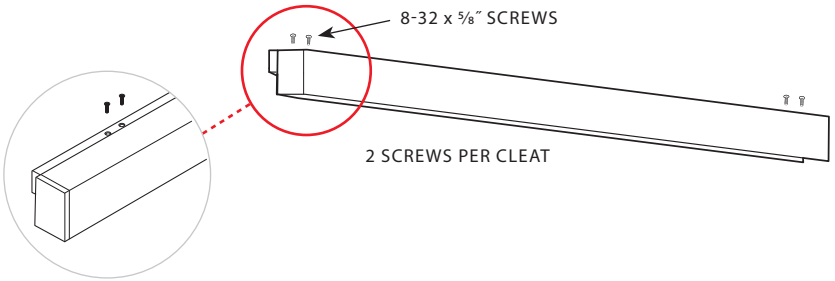

3) Attach WMC channel to structure — if using the aligner bracket to span between connection points, max span is 6´- 0˝. Continue installation of WMC channel until complete.

4) Lift the start fixture up to the installed channel and install cleat screws through WMC channel's factory drilled holes and into the factory installed cleats.

WALL

5) Continue to row joining steps.

WARNING: Ground fixture in accordance with local and national electrical codes. Failure to do so may result in serious personal injury
Fixture Installations should ONLY be done by a qualified licensed electrical professional.

PRUDENTIAL LTG.

PRULITE.COM 213.746.0360

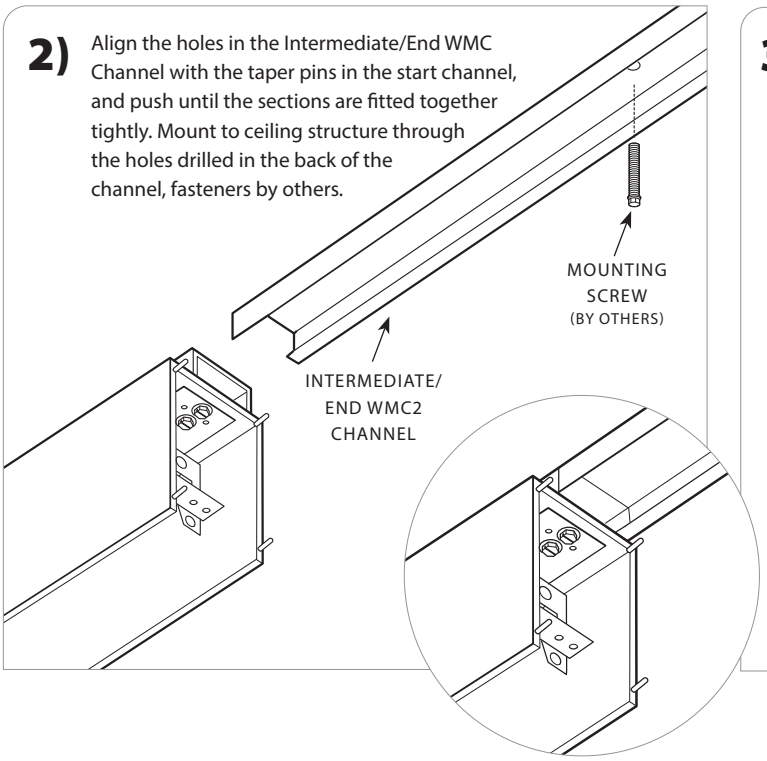

WMC SURFACE ROW FIXTURE INSTALL

DO NOT BUILD ROWS ON FLOOR TO HOIST **REQUIRES TWO PEOPLE TO INSTALL** **POWER CORD SHIPPED ATTACHED**

1) Remove cardboard inserts and reflectors. Leave LED assembly in place.

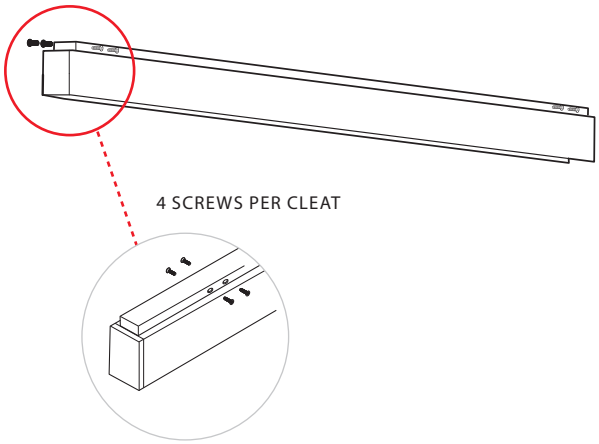

2) Align the holes in the Intermediate/End WMC Channel with the taper pins in the start channel, and push until the sections are fitted together tightly. Mount to ceiling structure through the holes drilled in the back of the channel, fasteners by others.

3) Lift the fixture up to the installed channel and install cleat screws through WMC channel's factory drilled holes and into the factory installed cleats. Tighten screws to channel.

SURFACE

WARNING: Ground fixture in accordance with local and national electrical codes. Failure to do so may result in serious personal injury

ROW FIXTURE INSTALL

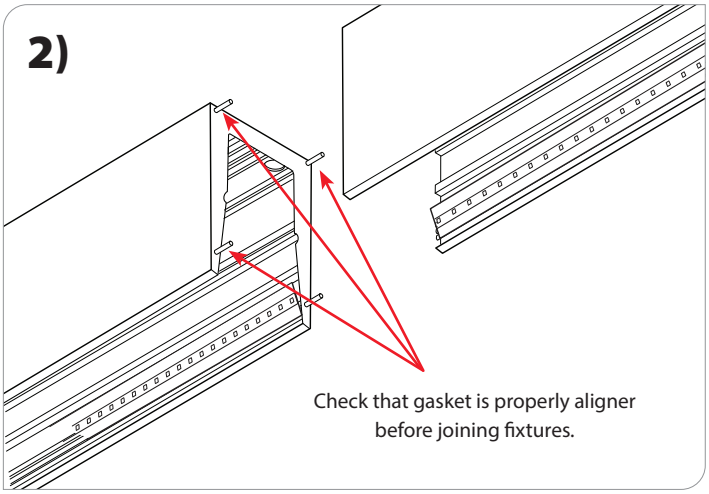

DO NOT BUILD ROWS ON FLOOR TO HOIST | **REQUIRES TWO PEOPLE TO INSTALL** | **CORD SHIPPED INSTALLED**

1) Remove cardboard inserts and reflectors. Leave LED assembly in place.

DIRECT

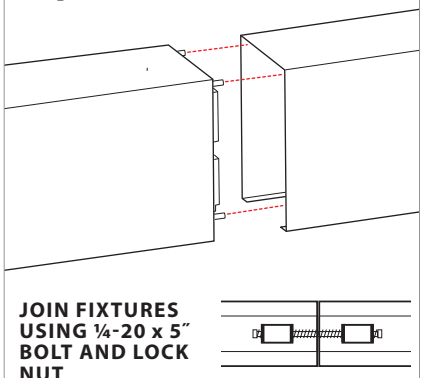

2)

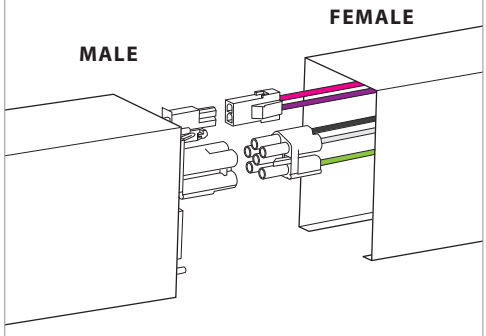

Check that gasket is properly aligner before joining fixtures.

3) Make sure pins are aligner.

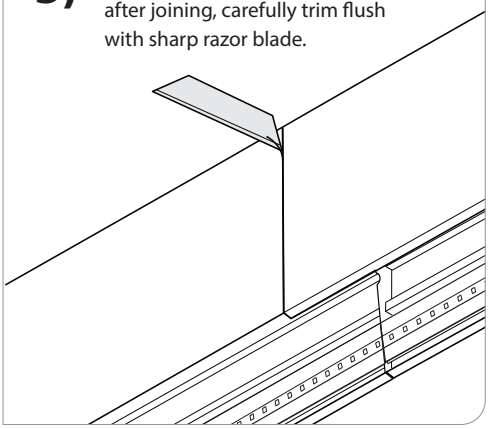

JOIN FIXTURES USING ¼-20 x 5″ BOLT AND LOCK NUT

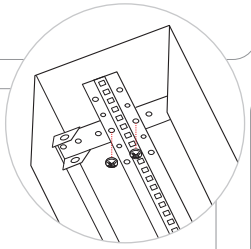

4) Make electrical and dimming harness connections.

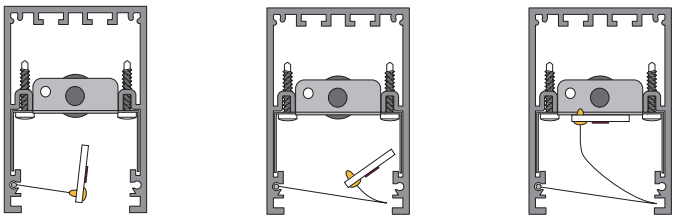

5) If gasket protrudes from the fixture after joining, carefully trim flush with sharp razor blade.

6) Using 6-32 x ¼″ screws, attach LED tray assembly to stiffener brackets. LED assembly should be relatively flush with the end of the extrusion/body when installed correctly.

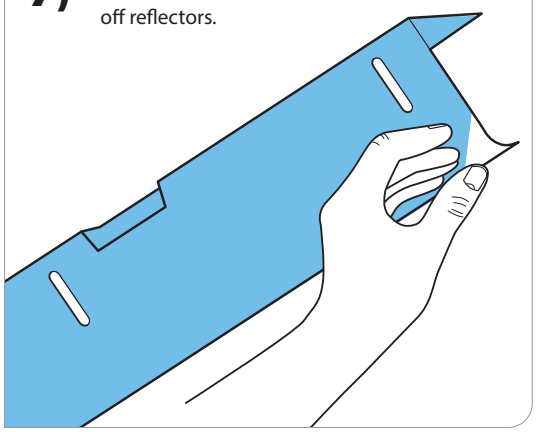

1. REMOVE LED ASSEMBLY

2. ROTATE LED ASSEMBLY

3. INSERT LED ASSEMBLY AGAINST STIFFENER

7) Peel blue protective covering off reflectors.

WARNING: Ground fixture in accordance with local and national electrical codes. Failure to do so may result in serious personal injury
Fixture Installations should ONLY be done by a qualified licensed electrical professional.

7) Install reflectors to fixture by attaching them to LED assembly using 6-32 x ¼˝ screws. Reflectors should be flush with end of LED assembly. Tuck wiring behind first installed reflector before installing the second.

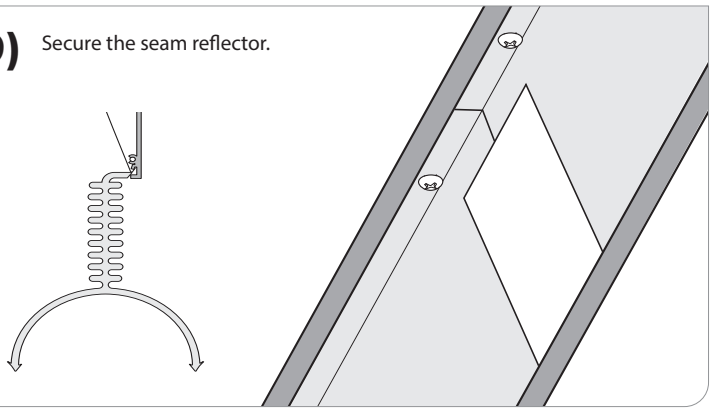

Reflectors should be flush with end of LED assembly.

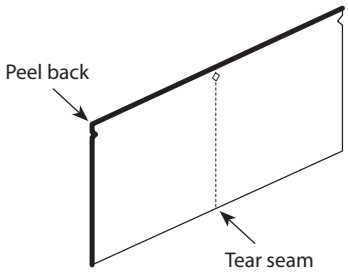

8) Place seam tape over reflector seam.

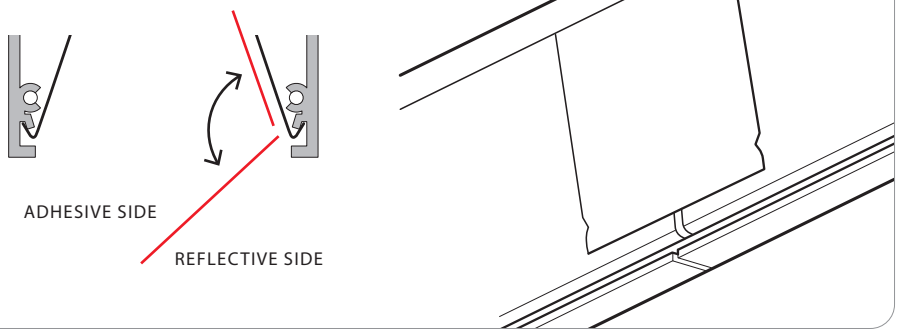

9) Secure the seam reflector.

10) Tear seam reflector at perforation. Peel film to reveal adhesive.

11) Insert seam reflector above break in reflector.

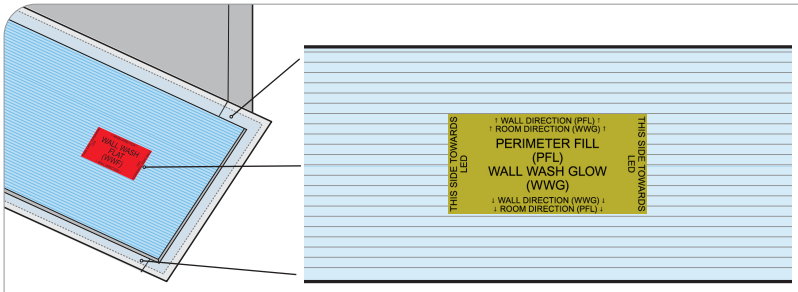

WARNING: Ground fixture in accordance with local and national electrical codes. Failure to do so may result in serious personal injury
Fixture Installations should ONLY be done by a qualified licensed electrical professional.

LENS INSTALLATION

ENERGIZE ROWS TO ENSURE ALL LEDS ARE WORKING BEFORE INSTALL **LENS REQUIRES TWO PEOPLE TO INSTALL**

LENS ORIENTATION

SAL – Satin lens has both sides the same, reversible, no orientation

BTW – Batwing shiny side UP, matte frosted side *DOWN*.

MGZ/WWG/PFL – Wall Wash and Perimeter lenses, ribbed side UP (they can be seen and felt).

NOTE: WWG and PFL are the same with opposite orientation

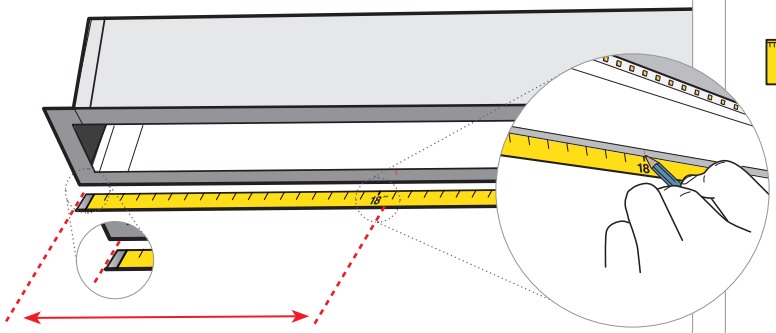

Stickers indicate *WALL* and *ROOM* sides.

RECOMMENDED: Start lens installation from *LEFT to RIGHT*.

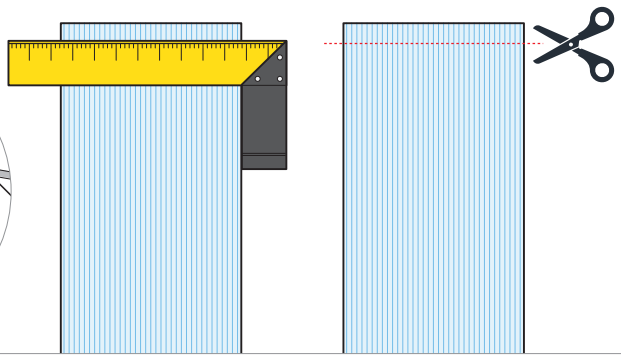

START → INTERMEDIATE → END

LENS INSTALLATION — IF ALL FIXTURES ARE ALREADY INSTALLED

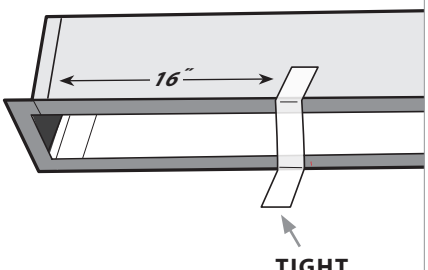

1) Measure 18″ from end cap. Using a pencil, place a small mark on the fixture.

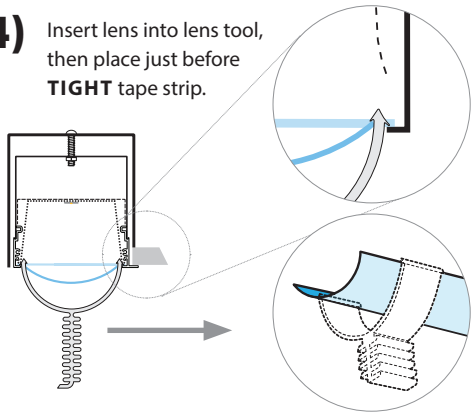

2) Make sure lens is square.

3) Install tape strip **TIGHTLY** approximately 16″ from start.

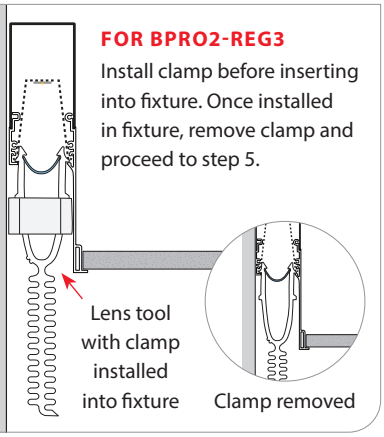

4) Insert lens into lens tool, then place just before **TIGHT** tape strip.

FOR BPRO2-REG3

Install clamp before inserting into fixture. Once installed in fixture, remove clamp and proceed to step 5.

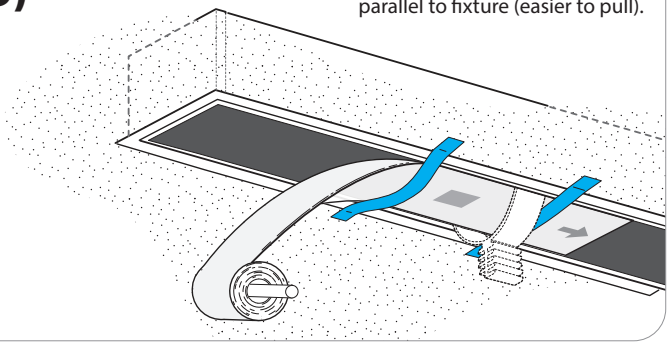

WARNING: Ground fixture in accordance with local and national electrical codes. Failure to do so may result in serious personal injury
Fixture Installations should ONLY be done by a qualified licensed electrical professional.

5)

Install **LOOSE** tape strip about 12″ from start to hold lens parallel to fixture (easier to pull).

6)

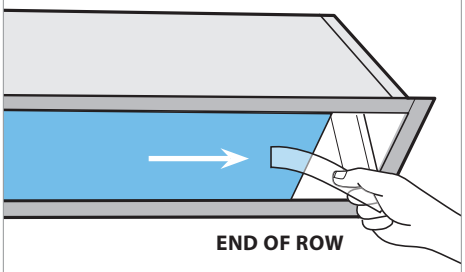

Pull lens through channel with fingers or non-marring pliers.

NOTE: Hold lens roll near ceiling, close to horizontal with fixture.

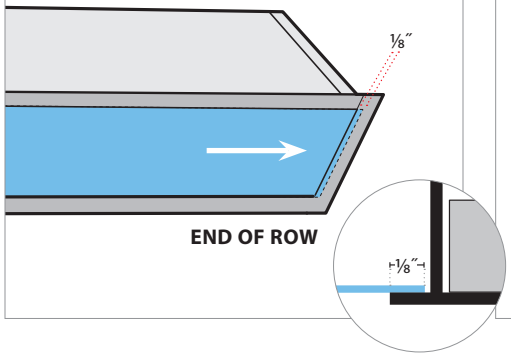

7)

Use tape strip to pull lens into end cap.

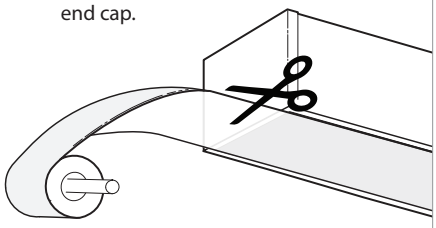

8)

Make sure lens is tucked inside end cap.

9)

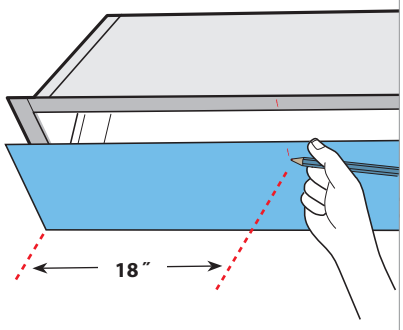

At start of fixture, remove tape strips and as a rough cut trim lens 1″ past end cap.

⚠ **MAKE SURE LENS IS TUCKED INTO END CAP AT END OF ROW AS SHOWN IN STEP 8**

10)

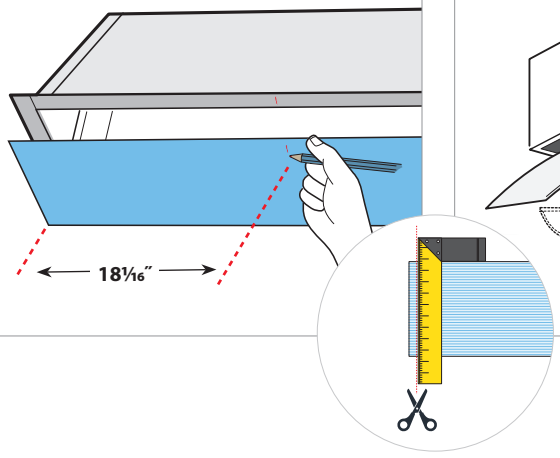

Mark lens with pencil where you made the mark 18″ from start of row inside fixture.

⚠ **MAKE SURE LENS IS TUCKED INTO END CAP AT END OF ROW AS SHOWN IN STEP 8**

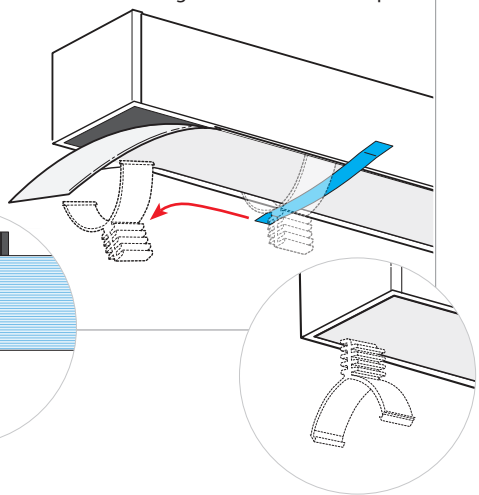

11)

Measure 18 1⁄16″ from mark on lens to near end of lens. Mark and trim lens.

12)

Slide lens tool end cap to insert remaining lens, using other end of tool or fingers to insert at end cap.

WARNING: Ground fixture in accordance with local and national electrical codes. Failure to do so may result in serious personal injury
Fixture Installations should ONLY be done by a qualified licensed electrical professional.

DUST COVER

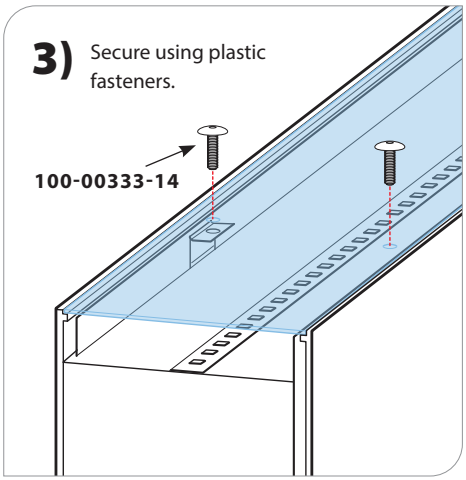

1) Bend tabs outward.

2) Place dust cover on top of the fixture.

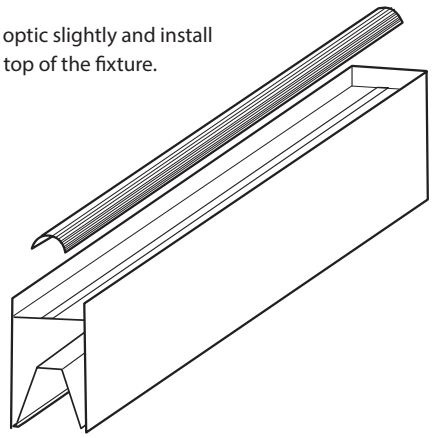

3) Secure using plastic fasteners.

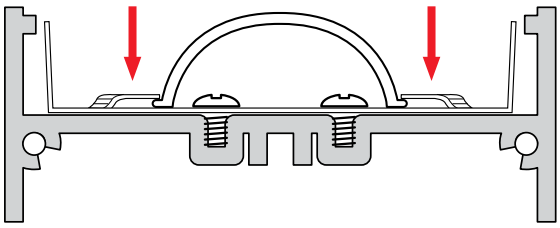

INDIRECT OPTIC

1) Squeeze optic slightly and install onto the top of the fixture.

2) Ensure that the optic is secured under the lances in the top reflector.

HCW / SCW / SACW

WARNING: Ground fixture in accordance with local and national electrical codes. Failure to do so may result in serious personal injury
Fixture Installations should ONLY be done by a qualified licensed electrical professional.
